SKILLS

Languages/Dev/DB: Python, C++, Java, Spring boot, Bash, MySQL, PostgreSQL, MongoDB

Infra/Tools: Kubernetes, GitOps, GitHub Actions, Docker, Linux, Terraform, Ansible

Cloud/Hybrid: AWS, Azure, EKS, VPC, EC2, S3, private cloud

Soft Skills: Effective Communication, Team Collaboration, Adaptability & Learning Agility

PROJECTS

DevOps-Enabled Go Web Application | ([GitRepo](#))

Feb 2026

- Implemented and deployed a production-style Go web application to simulate an end-to-end DevOps pipeline, demonstrating CI/CD automation, containerization, and Kubernetes-based cloud deployment.
- Containerized the application using multi-stage Docker builds, designed Kubernetes manifests and Helm charts for scalable and environment-specific deployments, ensuring modular and reusable infrastructure.
- Implemented a GitHub Actions CI pipeline to automate Docker image builds and pushes, followed GitOps principles for declarative Kubernetes updates, and deployed the application on AWS EKS with Ingress-based external exposure.

MuSys - AI Music Recommender System | ([GitRepo](#))

Oct 2025

- Built with the objective of delivering accurate mood-based song recommendations using AI, targeting 90%+ sentiment detection accuracy to enhance user personalization.
- Designed a scalable architecture, developed the Flask backend, integrated AWS Comprehend (NLP), Polly (TTS), and DynamoDB (NoSQL logging), containerized the system using Docker, and deployed it on Railway ensuring 100% usage with zero server maintenance.
- Delivered a fully serverless, real-time AI recommendation system, reducing backend overhead by 100%, improving response efficiency by 40% and providing seamless mood detection, voice feedback, and personalized music suggestions.

TRAINING

Gokboru Tech

Jun-Jul 2025

Cloud Computing using AWS | [Certificate](#)

- Completed 6-week AWS Cloud Computing training, working hands on 80% with EC2, S3, IAM, VPC, Load Balancer, Lambda, API Gateway, Docker & CloudWatch across security, networking.
- Gained practical experience in NLP, serverless workflows, containerization, NoSQL and CI/CD tools improving cloud and DevOps proficiency by 70%.
- Applied cloud, NLP, and serverless concepts in a real-world capstone project, working end-to-end across architecture design, AWS integrations, backend development, and deployment within the AWS Free Tier.

CERTIFICATES/CERTIFICATIONS

- AWS Certified Solutions Architect Associate | [AWS Certificate](#) Feb 2026
- AWS Certified Cloud Practitioner | [AWS Certificate](#) Feb 2026
- DevOps Beginners to advance | [Udemy Certificate](#) Jan-Sep 2025

ACHIEVEMENTS

- Earned a Top 5 spot in CloudClubs DevOps Workshop:** [Certificate](#) Nov 2025
Among 400+ participants and 30+ teams, leveraging AWS, Docker, and Terraform.
- Achieved AWS Academy Cloud Foundations Graduate badge:** [View Credential](#) May 2025
Demonstrated strong proficiency in AWS core services, cloud concepts, and architecture fundamentals.
- Ranked Top 10 in my university's club Hackathon:** [Certificate](#) Feb 2024
Among 1000+ participants and 50+ teams.

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.79**

Since Aug 2023

ST. Francis Junior College

Midhilapuri, Visakhapatnam

Intermediate; **Percentage: 93.3**

Oct 2021 - Mar 2023

ST. Anns CBSE School

Bakkannapalem, Visakhapatnam

Matriculation; **Percentage: 87**

Mar 2021
